

On the Subject of... I Forgor

Every time you solve a module, every module on the bomb will shuffle around. Be sure to remember 😊 the starting position of this module.

This module can be solved any time after at least one shuffle has occurred, as long as it is in its starting position. If the total number of times it has shuffled to its starting position so far is even, press the right eye. Otherwise, press the left eye.

If multiple modules solve at once, only one shuffle will occur.
